ePrototype Bazaar Outline

Professor Rene W. Wagenaar ePrototype Bazaar is a regular session part of the Bled eConference, dedicated to presenting the work of PhD-students, Master students and distinctive students in area of innovative eBusiness ideas and software prototypes.

Accepted proposals are presented in poster format during the conference, as well as by oral presentation. The students have also the opportunity to discuss their ideas with conference participants who also jury and score the proposals. The best presentation will be rewarded with the Rene Wagenaar Award for MSc and PhD students.

The Bled eConference Committee is expressing appreciation of Rene's contribution in the past years. Among others, he has brought a group of three students to Bled in 1992 for the first time. After the conference, they have taken one of the University of Maribor students to the Erasmus University in Rotterdam (Rene's university at that time) for two weeks. That has meant a major change in a way we were involving students into the Bled eConference program since then. One of the results was a formalization of the prototypes presentations, named "Students Bazaar" in recent years. From 2007 on, the ePrototype Bazaar of the annual Bled eConference is named in Rene’s honor.
